Title = OddEvenThread

```
class OddEvenThread {  
    public static void main(String[] args) {  
        Thread oddThread = new Thread(() -> {  
            for (int i = 1; i <= 20; i += 2) {  
                System.out.println("Odd: " + i);  
                try {  
                    Thread.sleep(500);  
                } catch (InterruptedException e) {  
                    e.printStackTrace();  
                }  
            }  
        });  
  
        Thread evenThread = new Thread(() -> {  
            for (int i = 2; i <= 20; i += 2) {  
                System.out.println("Even: " + i);  
                try {  
                    Thread.sleep(500);  
                } catch (InterruptedException e) {  
                    e.printStackTrace();  
                }  
            }  
        });  
  
        oddThread.start();  
        evenThread.start();  
    }  
}
```
